

***Curriculum Coordinator Report:***

*September 2024*

***Curriculum Alignment:***

- I continue to develop plans to further our improvement in the areas of data analysis, AIS/ MTSS implementation, teacher growth and practice, and the alignment and prioritization of curriculum in every content area and at every grade level.

***Professional development:***

- The pk- 5 teachers all attended a launch training for the Eureka math curriculum. They were very excited to use the new curriculum. After an intense in depth look, they felt that there is a clear progression between grade levels for vertical alignment. They also felt that the teacher directions were very clear and understandable, which will help with implementation. In addition, a key strength is that it provides regular opportunities for student engagement through hands-on activities. They believe that this will elevate student participation, and ultimately, learning.
- The teachers will be taking the second training in September titled: “ Teach: Effective Instruction”.

***Data***

- We will be beginning to analyze our state performance data as more of it arrives. This will be shared with teachers to discuss successes and areas for growth and adjustment in their instructional practices and curriculum priorities.

***Individual Teacher Support:***

- In preparation for school, the administration team has continued to make sure that all teachers had the resources they needed to start the school year.

***Planning and Preparation:***

- I continue to organize, strategize, and create resources to share with teachers this year.
